

MOHAMMED ABUTHAHIR BASITH A

Full Stack Developer

Erode, Tamil Nadu — +91 7810016907 — mohammedabuthahir29@gmail.com — GitHub — LinkedIn — LeetCode

PROFESSIONAL SUMMARY

Full Stack Developer who treats performance, reliability, and design fidelity as engineering first principles — not afterthoughts. With 2 years shipping production features on enterprise platforms for international clients, brings a rare combination of Java/Spring Boot backend depth and React/Vue.js frontend polish under one roof. Approaches every codebase with a product ownership mindset: reducing technical debt, building reusable component libraries. Driven by clean architecture, measurable outcomes, and the challenge of solving problems that matter at scale.

SKILLS

Languages	Java, JavaScript (ES6+), Python
Frontend	React.js, Vue.js, HTML5, CSS3, Redux, React Hooks, Context API
Backend	Spring Boot, RESTful APIs, Java 8 (Streams & Lambdas), Spring Cloud, Hibernate
Databases	PostgreSQL, MySQL
Cloud	AWS (EC2, S3), Docker, Jenkins, Nginx
Version Control	Git, GitHub

EXPERIENCE

Software Developer / Full Stack Developer

Jul 2024 – Present

Vaken Technologies Pvt. Ltd. | Trichy

- Delivered 5+ production features end-to-end on the Sovablu enterprise platform with zero post-deployment defects and consistent 99%+ uptime across the full development lifecycle.
- Reduced application load times by 40% via performance profiling, efficient rendering patterns, and browser DevTools-driven debugging.
- Built pixel-perfect, cross-browser responsive UIs using React.js, Vue.js, and Redux, achieving 95%+ design fidelity across Chrome, Firefox, Safari, and Edge.
- Designed RESTful APIs and refactored legacy Java code with Java 8 streams and lambdas, delivering a 20% backend performance improvement.
- Built reusable React component libraries and custom hooks with Redux state management, cutting feature development effort across the team.
- Collaborated directly with Japanese clients during Agile sprints to gather requirements and align technical deliverables with business goals.

PROJECTS

Full-Stack Billing Application *React, Spring Boot, PostgreSQL, Vercel, Render, Neon Database*

- Production-grade invoicing system with role-based auth, RESTful APIs; frontend deployed on Vercel and backend on Render.

CodePen Clone *React, HTML5, CSS3, JavaScript*

- Real-time collaborative code editor with live preview, code splitting for bundle optimization, and a fully reusable, scalable component architecture.

Sovablu Enterprise Modules *Java, Spring Boot, React.js*

- Developed Expense Management, Leave Request, and Ticket Creation modules with integrated REST APIs, backend validations, and complex business-logic workflows.

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering

Nandha Engineering College, Erode

2020 – 2024

CGPA: 8.6 / 10
